Chemistry: Hydrolysis of Amides

The alkaline hydrolysis of amides actually involves reaction with hydroxide ions, but the result is similar enough that it is still classed as hydrolysis.

Ammonia solution - Wikipedia

Although the name ammonium hydroxide suggests an alkali with composition ... ammonia solution was traditionally used to darken or stain wood containing tannic acid.

https://en.wikipedia.org/wiki/Ammonium_hydroxide

ammonium hydroxide | H5NO - PubChem

Ammonium hydroxide is the hydroxy salt of ammonium ion. It is formed when AMMONIA reacts with water molecules in solution.

Ammonium hydroxide hydrolysis - Journal of Lipid Research

Ammonium hydroxide hydrolysis a valuable support in the MALDI-TOF mass spectrometry analysis of Lipid A fatty acid distribution

<http://www.jlr.org/content/43/12/2188.full>

pKa Chart 1 2 conjugate acid conjugate base ...

ammonia/amines 36 (amide bases) (alkoxides) hydrogen 35 one way only ... conjugate acid conjugate base conjugate acid conjugate base (hydroxide) (tert-butoxide)

http://cactus.dixie.edu/smblack/chem2310/summary_pages/pKa_chart.pdf

What does ammonium hydroxide and hydrochloric acid produce ...

The ammonium in the ammonium hydroxide replaces the hydrogen in the hydrochloric acid in the reaction to make Ammonium Chloride (NH₄Cl) and Water (H₂O).
